

FIG. 1

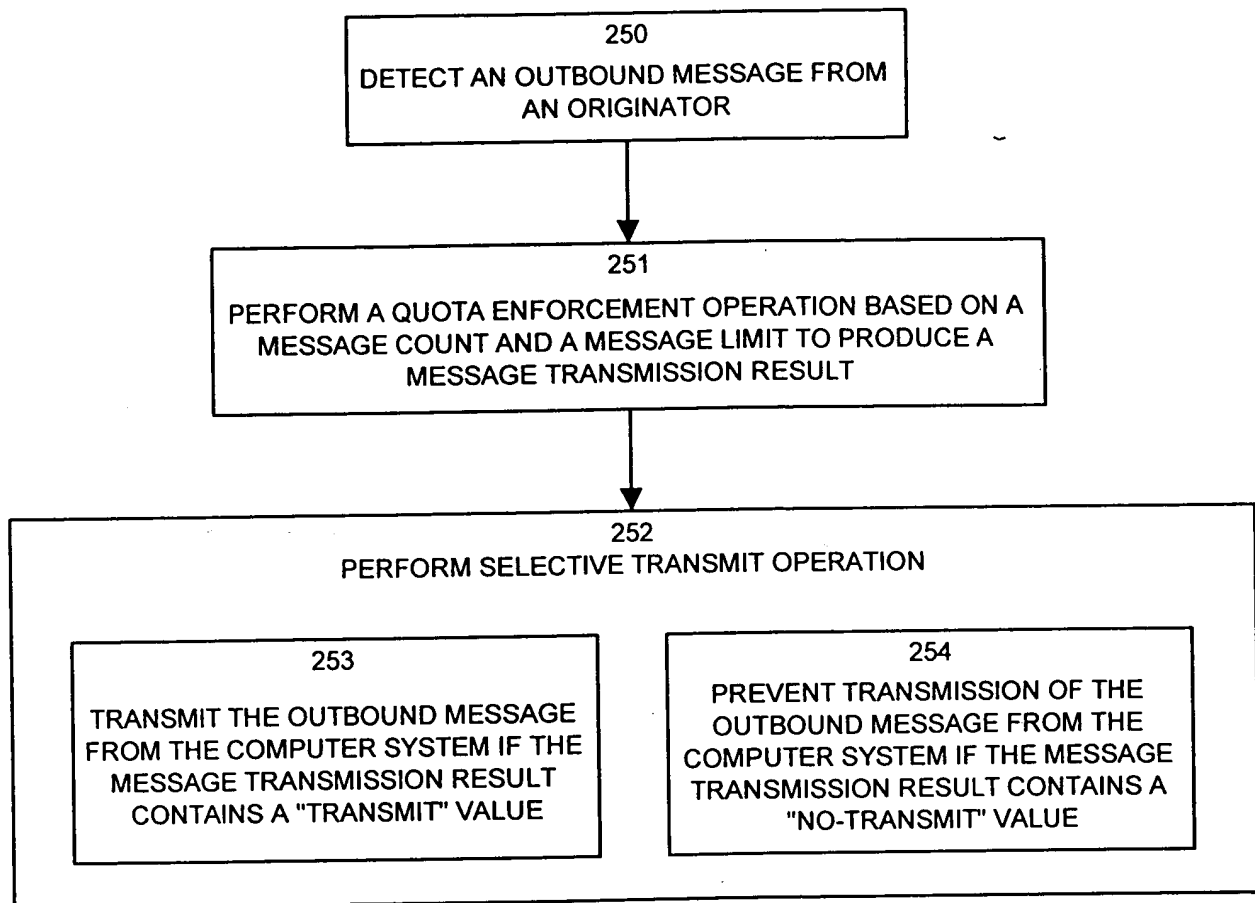

FIG. 2

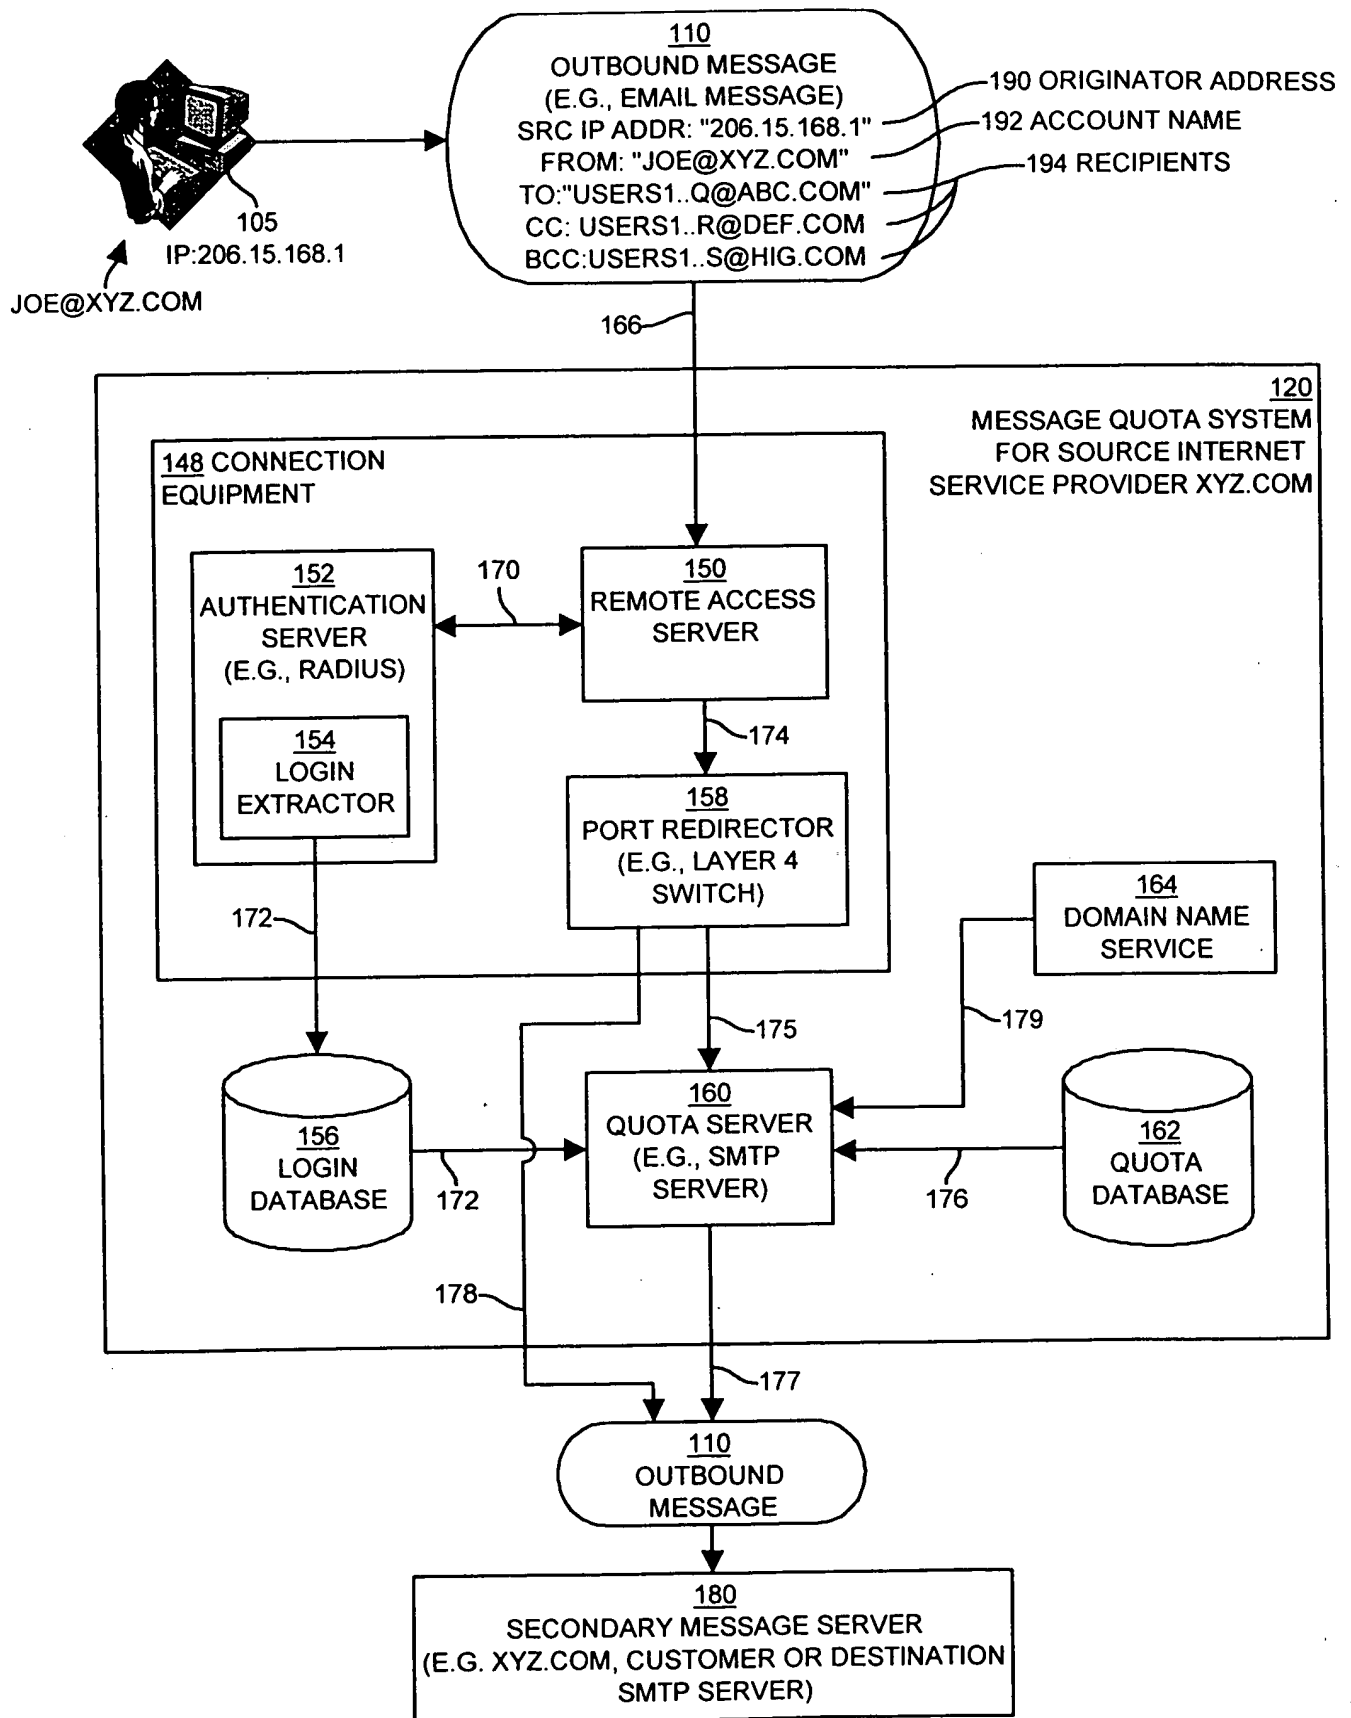

FIG. 3

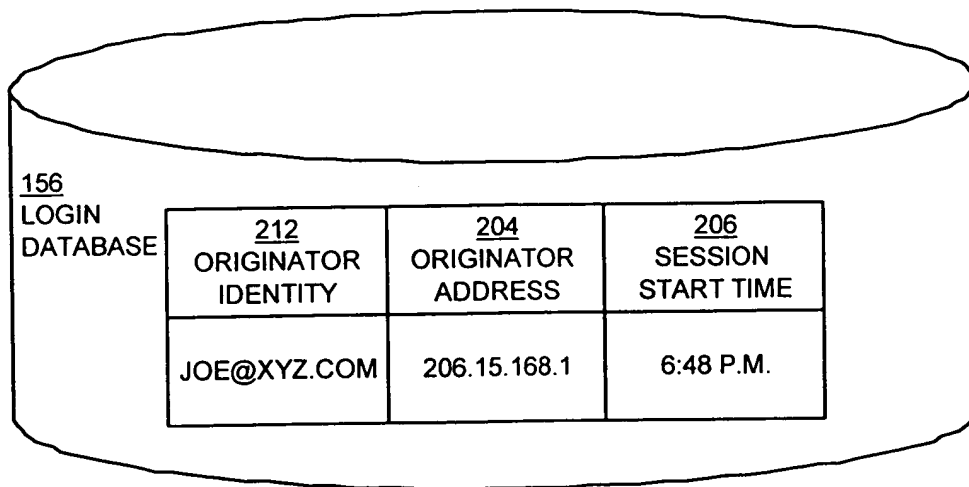

FIG. 5

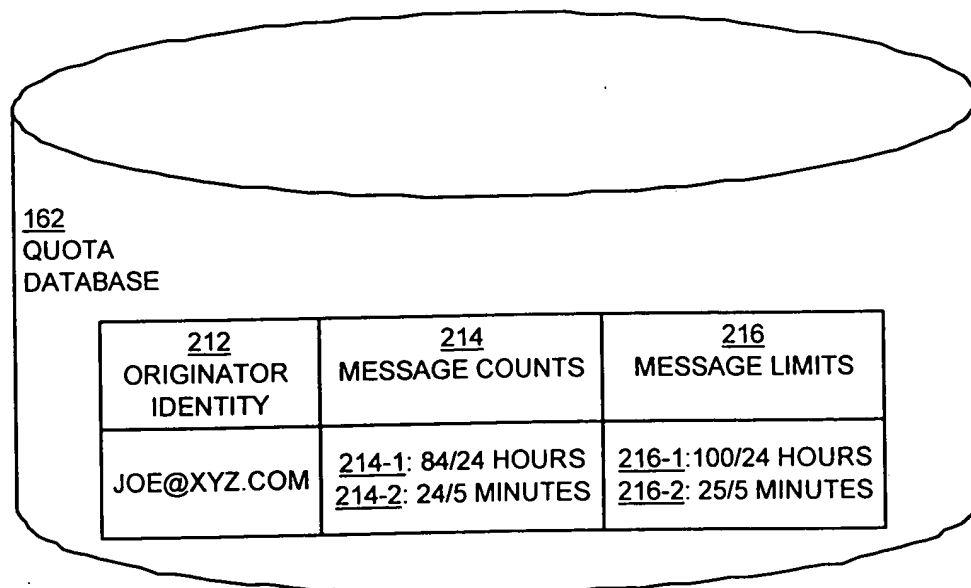

FIG. 6

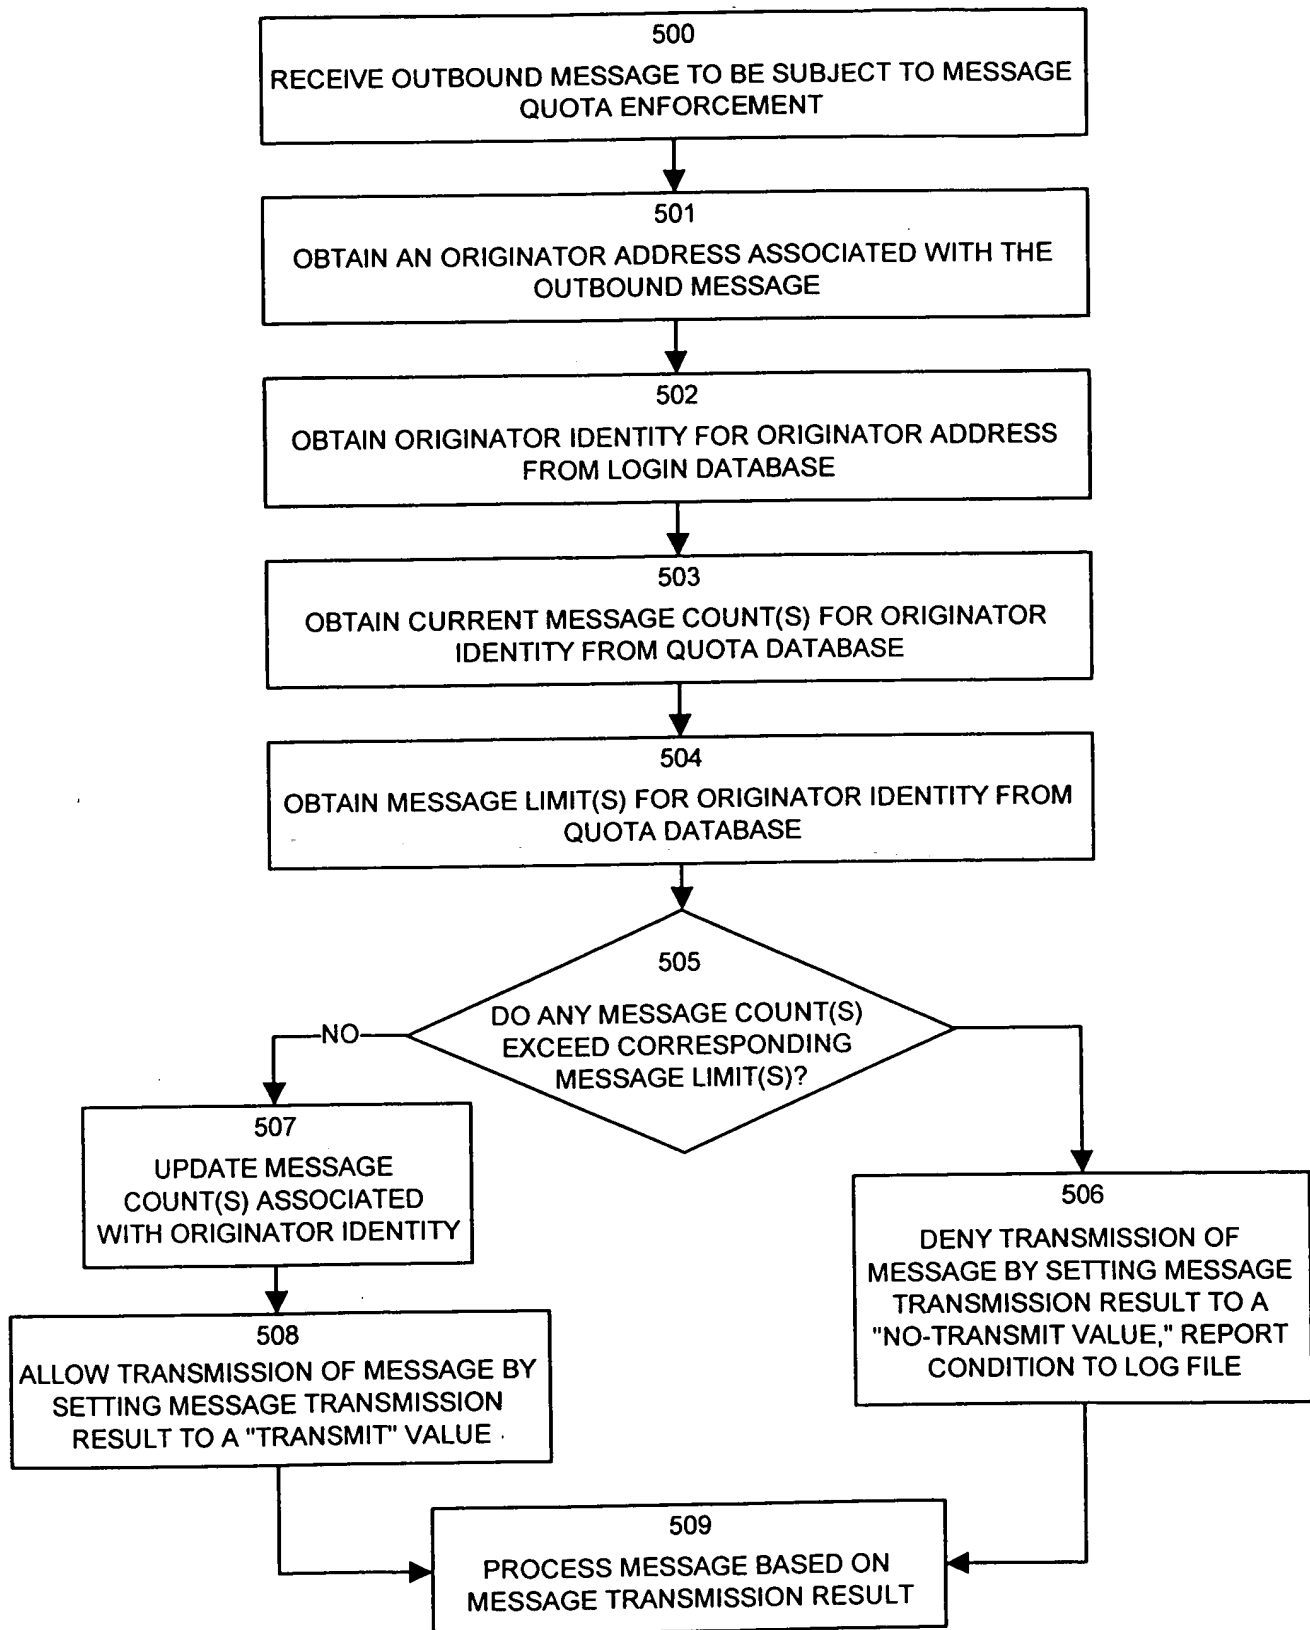

FIG. 7

FIG. 8 is a block diagram of a network system for message quota enforcement. The system includes a user 105 sending an outbound message 110 to a network service provider 182. The provider includes a message server 184 and connection equipment 148. The connection equipment is connected to a login database 156, which is in turn connected to a quota server 160. The quota server is part of a network service provider offering message quota enforcement service 183. The system also includes a computer network 130 (e.g., Internet) connecting the providers to destination message systems 140 and 142, which are then connected to destination users 144, 144-2, and 144-3.
